

ABSOLUTE. PREMIUM. PROTECTION.™

# Green with envy?

**W**iley X, Inc has poured its 30 years of experience crafting premium protective eyewear into its latest innovation for anglers and boaters: the WX Omega. This new Active Lifestyle Series model offers anglers and others who work or play on the water superior visual performance and protection. With their eight-layer polarisation, emerald green mirror coating and amber tint, these lenses are engineered to amplify colour contrast and deliver high visual definition – ideal for spotting game fish, schools of bait, shallow drop-offs, structure and other important visual cues either inshore or offshore. These shatterproof Selenite polycarbonate lenses also provide 100 per cent UVA/UVB protection and an advanced T-Shell coating that resists scratching during rugged outdoor use. The same performance features that make these advanced new shades great for fresh and saltwater anglers make them an ideal choice for sailors, kayakers, cruisers and anybody who spends time on the water.

The Wiley X name is recognised worldwide for advanced protection along with clear vision, and these new shades certainly won't disappoint any anglers. The WX Omega meets ANSI-Z87.1 High Velocity and High Mass Impact standards as well as US Federal OSHA 1910.133(b)

(1)(1) standards, providing wearers with occupational-grade protection for every activity. This means anglers can fish hard all day in the face of potential dangers, which includes airborne debris, flying lures and low-hanging branches. Wiley X is the only

premium sunglasses brand with this level of protection in every adult style it makes — a key reason why the company is a leading provider of protective eyewear to the US military, law enforcement, professional tournament anglers and others who need

The new Wiley X Omega featuring polarised emerald green mirror lenses and stylish Kryptek Neptune camouflage frames is just one of three new Kryptek styles, a style that won the Best New Eyewear crown at this year's EFTTEX, turning its competition green with envy.

the ultimate in protection and performance.

Another thing that sets these distinctive glasses apart is the frame's unique Kryptek Neptune camouflage. Whether you want to blend in while chasing skinny-water game fish, stand out in a captain's meeting or just look great while hanging out on deck, these stylish shades fit the bill. Unlike traditional stick-and-leaf camouflage, the Kryptek design incorporates micro and macro layering inspired by artillery camouflage netting. The blue-based marine Neptune design provides both effective silhouette break up for water environments and a stylish complement to the emerald green mirror lenses. In addition, the WX Omega's lightweight frame features a double-injected rubber nose piece for non-slip comfort, even when the action gets hot and sweaty.

Like almost all Wiley X sunglasses styles, the new WX Omega is prescription ready. This level of visual performance combined with the most advanced eye protection available makes the WX Omega a great choice for active anglers who need prescription lenses; to help prescription lens users Wiley X has carefully chosen Shamir — one of the leading lens manufacturers — to provide high-quality prescription lenses that fully comply with European safety standards. 🇩🇪
