<p><b>TUNA ALLEY SUNGLASSES</b></p> <p>These sunglasses are named after a legendary 15-mile-long white strip of sand separating the deep blue Bahamian waters from the shallow bank of Gun Cay, where you can spy tons of bluefin tuna migrating north at the right time of year.</p> <p>They feature an integral hinge, comfortable large fit and can be equipped with Costa's 580P or 580G polarised lenses.</p>	<p><b>ROLLER AND SLACK TIDE SUNGLASSES</b></p> <p>Two new, wraparound frame styles have been added to the 2016/2017 Flying Fisherman collection of eyewear for anglers.</p> <p>The Roller is a medium/large wrap frame that features on-trend design and generous polarised coverage with wider temples to block out side glare.</p> <p>Also new is the Slack Tide, a sporty, medium-fit frame with wraparound coverage to eliminate polarised glare, and the temples have a slot for adding a lanyard of your choice. The lightweight frames are available in matte black and crystal grey.</p>	<p><b>TITANIUM SERIES SUNGLASSES</b></p> <p>Featuring super-strong and lightweight titanium hinges inside a lightweight and durable carbon and titanium handcrafted frame, the Titanium series from Lenz is an attractive range.</p> <p>The sunglasses feature certified Zeiss polycarbonate lenses, which are impact and scratch resistant as well as offering 100 per cent polarisation. They also have 100 per cent UV protection.</p> <p>A special anti-reflective coating reduces reflected light and eliminates 'ghost images' in the viewer's eye line.</p>	<p><b>PHOTOCHROMIC SUNGLASSES</b></p> <p>Daiwa's Photochromic sunglasses offer a reactive level of shade as the brightness level changes. Using lightweight TAC lenses that offer excellent optical qualities they are especially scratch resistant.</p> <p>The frames feature a striking design that not only looks unique but also reduces the overall weight of the glasses, making them more comfortable to wear for long periods.</p>
