

POLYCARBONATE PRESCRIPTION INFORMATION

Wiley X sports glasses can be fitted with customized prescription lenses, so you can enjoy your favorite activities and extreme sports without impaired vision.

Wiley X use Shamir polycarbonate lenses for prescription jobs, due to Shamir's unique safety lens collection developed for wraparound sports frames. This optical design compensates for the high base curve of the lens, which minimizes side distortion on both single vision and progressive lenses. Furthermore you get the same safety standards as the Wiley X non-prescription eyewear.

The Shamir lenses are available in many colors and with different features like transition (light adjusting) and polarization. A number of special coatings and mirrors can be added, but the lenses always come with improved scratch resistant coating.

The majority of all Wiley X frames can be fitted with prescription lenses - ask your local optician for further information or go to www.wileyx.eu and explore the vast possibilities.

All parameters below apply single vision lenses.

WX ACE

	POWER RANGE MAX CYL +/- 4.00	SINGLE VISION MINIMUM PD	PROGRESSIVE [ADD 1.00-3.50] (SEG. HT 14 TO 26) MINIMUM PD	ADD POWER RANGE
