

NEW WX OMEGA BY WILEY X® FEATURES POLARIZED EMERALD GREEN MIRROR LENSES AND STYLISH KRYPTEK® NEPTUNE® CAMOUFLAGE FRAME

The WX Omega with Kryptek Neptune™ is one of 3 new WX Kryptek styles launched this year. The popularity of these styles goes far and wide with one of them being crowned as best new fishing eyewear for 2017/18 at Efttex.

Wiley X®, Inc. has poured its 30 years of experience crafting premium protective eyewear into its latest innovation for anglers and boaters — the new WX Omega with Polarized Emerald Green Mirror lenses and a frame dressed in advanced Kryptek® Neptune® camouflage.

This new Active Lifestyle Series model offers anglers and others who work or play on the water superior visual performance and protection. With their 8-layer polarization, Emerald Green Mirror coating and Amber tint, these lenses are engineered to amplify color contrast and deliver high visual definition — ideal for spotting gamefish, schools of bait, shallow drop-offs, structure and other important visual cues either inshore or offshore. These shatterproof Selenite™ polycarbonate lenses also provide 100% UVA/UVB protection and an advanced T-Shell™ coating that resists scratching during rugged outdoor use. The same performance features that make these advanced new shades great for fresh- and saltwater anglers make them an ideal choice for sailors, kayakers, cruisers and anybody who spends time on the water.

The Wiley X name is recognized worldwide for advanced protection along with clear vision, and these new shades certainly won't disappoint any anglers. The WX Omega meets ANSI-Z87.1 High Velocity and High Mass Impact standards as well as Federal OSHA 1910.133(b)(1)(1) Standards, providing wearers with occupational grade protection for every activity. This means anglers can fish hard all day in the face of potential dangers that include airborne debris, flying lures and low-hanging branches. Wiley X is the only premium sunglass brand with this level of protection in every adult style it makes — a key reason why the company is a leading provider of protective eyewear to the U.S. military, law enforcement, professional tournament anglers and others who need the ultimate in protection and performance.

Another thing that sets these distinctive glasses apart is the frame's unique Kryptek® Neptune® camouflage. Whether you want to blend in while chasing skinny-water gamefish, stand out in a captain's meeting or just look great while hanging out on deck, these stylish shades fit the bill. Unlike traditional stick-and-leaf camouflage, the Kryptek design incorporates micro and macro layering inspired by artillery camouflage netting. The blue-based marine Neptune design provides both effective silhouette break up for water environments and a stylish compliment to the Emerald Green Mirror lenses. In addition, the WX Omega's lightweight frame features a double-injected rubber nosepiece for non-slip comfort, even when the action gets hot and sweaty.

Like almost all Wiley X sunglass styles, the new WX Omega style is prescription ready. This level of visual performance combined with the most advanced eye protection available makes the WX Omega a great choice for active anglers who need prescription lenses.

About Wiley X:

Wiley X is one of the leading manufacturers of protective eyewear in the world and the only premium sunglass brand whose entire sunwear line is ANSI Z87.1-2010 rated and EN.166 certified.

Wiley X provides protective eyewear to military units and law enforcement personnel all around the world including the US Navy, US Army and D.E.A., as well as many EMEA forces.

All sunwear models are certified as protective eyewear – and ALL meet or exceed standards not normally used in the fishing industry. Some of the models even meet or exceed the US Military's ballistic tests for impact – the most stringent in the world. This is extremely important as fishermen have lures, flies, spoons and hooks flying in the air at all times, causing facial and eye accidents every day worldwide.

To help prescription lens users Wiley X has carefully chosen SHAMIR - one of the leading lens manufacturers to provide high quality prescription lenses, which fully comply with European safety standards.
