

Sanita®

AW22

SANITA IS MANUFACTURER OF CLOGS SINCE 1907

Quality materials, Danish design and comfort are the secrets to our success.
Sanita clogs are produced in Europe; handcrafted by dedicated highly skilled people.

Passion for clogs... for more than a century.

We are proud to present our Autumn/Winter collection 2022 pictured photographer
Thomas Baunsgaard in HØJHUSET/Herning; the city of Sanita Head office.

BASIC LIFESTYLE

The Sanita DNA: Handcrafted Original Danish Clogs since 1907 – more than 110 years of experience in clog making.
Comfort and quality are keywords for this wide range of wooden clogs made in a selection of genuine leathers
– oiled, patent or printed variation.

OIL NUBUCK LEATHER

Oil nubuck is thick cow leather with a buffed and oiled surface.
The oil treatment creates a natural mat look and high light the dept in the colours.
In addition, the leather become soft and flexible; the oil finish also makes the leather water repellent.

CLEANABLE LEATHER / PU

PU coated leather is split leather (suede) with a Polyurethane foil covering the surface
The strong and uniform PU foil is strong and durable and make the clog suitable for work.
The surface of the leather can easily be cleaned; even with disinfecting liquid.

CARE GUIDE

WOOD OUTSOLE GENERAL PRODUCT FEATURES

WOOD by Sanita is the foundation of the brand and holds longevity for comfort, quality, and fashion in its design.

Our wooden soles are selected for its beautiful flawless elements as well as its ease in crafting an anatomically correct foot bed. The style speaks for itself and breaks the boundaries of conventional footwear.

Anatomically correct footbeds carved to cradle the foot for the best arch support. Flex sole is made by a mix of wood and rubber, which combines the fashionable look from wooden soles with the comfort from rubber soles.

SOFT COMFORT OUTSOLE GENERAL PRODUCT FEATURES

The design creates a subtle rocking motion that propels you forward while taking pressure off each step. This movement reduces the strain on your lower back and legs.

Polyurethane (PU) outsole constructed and reinforced with an invisible frame to provide stability and durability. Anatomically shaped footbed engineered for arch support and a roomy toe box.

Rocker bottom construction allows natural motion from heel to toe encouraging healthy stride.

HOW TO CARE FOR YOUR CLOG

PATENT

Our patents can be wiped down with soap and water or with a clean damp or soft dry cloth.

SUEDE

Clean with damp cloth or brush with soft metal brush. Use waterproof spray for protection.

OIL LEATHER/OIL NUBUCK

Our oil leathers have a heavy oil finish and scuffs can easily be rubbed out. Clean with water or soap on a damp cloth. Spots can also be brushed off with a soft metal brush before adding oil leather restorer for an upper in nearly new condition.

TEXTILE

Our various textiles can be cleaned with damp cloth. Use waterproof spray for protection.

SOFT LEATHER

A very soft and light milled leather. Clean with damp cloth before adding neutral leather cream.

NUBUCK

The nubuck has a brushed grain, which gives a silky feel. Clean with damp cloth or brush with soft metal brush. Spray with waterproofing spray.

FULL GRAIN LEATHER

This leather is a full grain leather that can be restored by wiping down dirt and scuffs with a soft dry or damp cloth. Condition with neutral leather cream.

PULL UP LEATHER/ANTIQUE FINISHED LEATHER

Clean with damp cloth before adding neutral leather cream. Scuffs can easily be rubbed out.

PU LEATHER

Our Pu leather is a coated leather which is water repellent and easy to clean. Clean with water or soap on a damp cloth.

FUR

Our cow furs are best cared for by wiping off dirt with a damp cloth and using a waterproofing spray.

PRINTED LEATHER

Clean with damp cloth. Use waterproof spray for protection.

PU SOLES

Clean with water or soap on a damp cloth. When you dry the shoes after cleaning never leave them on a hot spot, as it will make the leather shrink and pull the clog and footbed out of shape.

WOOD SOLES

Clean with warm soapy water on a damp cloth. Water will not damage the wood, the important thing is just to dry slowly – no direct sunlight or on the radiator. If a wood chip is kicked off the sole it can be glued back on. Wood that has faded can be freshened up using oil, dark furniture stain or wood dye.

HOW TO CARE FOR YOUR RUBBER BOOT

Your rubber boot is made of NATURAL rubber and need care. Rinse them with clean water to remove dirt or use a mild soap. Do not put your rubber boots in the sun to dry as too much heat can cause them to crack. You should regularly clean and condition your boots to keep them from drying out.

Let your Sanita product age gracefully.
