WATER RESISTANT OIL LEATHER

The water resistant oil leather is tested according to European norm EN ISO 5403 :2002 prepared by European Committee for Standardization – This international standard specifies a method for determining the dynamic water resistance of leather. It is applicable for all flexible leathers but is particularly suitable for leather intended for footwear uppers. The water resistance of the leather along with the OIL finish ensures easy care of the leather.

NOTE:
Due to their construction the clogs are not water proof!

A very soft and tight milled leather. Clean with damp cloth before adding neutral leather cream.

ANILINE
Our aniline leather has a light and soft touch. Clean with damp cloth before adding neutral leather cream.

NUBUCK
The nubuck has a brushed grain, which gives a silky feel. Clean with damp cloth or brush with soft metal brush. Spray with a commercial waterproofing spray.

YAK
Remove dirt with a wet cloth, dry slowly in room temperature, eventual-ly fresh up with a neutral leather cream.

FG LEATHER
This leather is a full grain leather that can be restored by wiping down dirt and scuffs with a soft dry or damped cloth. Condition with neutral leather cream.

PULL UP LEATHER
Clean with damp cloth before adding neutral leather cream.

PU LEATHER
Our Pu leather is a coated leather with a good waterresistant. Clean with water or soap on a damped cloth.

FUR
Our neutral cow furs are best handled by a light spray of commercial waterproofing and spot cleaned with a damp cloth.

BRUSHED LEATHER
This leather is polished to a high-sheen. Clean with damp cloth before adding neutral leather cream.

PRINTED LEATHER
Clean with damp cloth. Use waterproof spray for protection.

DISTRESSED LEATHER
Clean with damp cloth or brush with soft metal brush. Use waterproof spray for protection.

PU SOLES
Clean with water or soap on a damp cloth. When you dry the shoes after cleaning never leave them on a hot spot, as it will make the leather shrink and pull the clog and footbed out of shape.

WOOD SOLES
Clean with warm soapy water on a damp cloth. Water will not damage the wood, the important thing is just dry slowly – no direct sunlight or on the radiator. If a piece chips off the sole it can be glued back on. Wood that has faded can be freshened up using oil, dark furniture stain or wood dye.

HOW TO CARE FOR YOUR RUBBERBOOT

Your rubberboot is made of NATURAL rubber and need care. Rinse them with clean water to remove dirt or use a mild soap. Do not put your rubberboots in the sun to dry as too much heat can cause them to crack. You should regularly clean and condition your boots to keep them from drying out.

Let your SANITA clogs age gracefully.
